

NATIVE PLANT NURSERY

L. L. Edmunds

813 El Rio Road

Danville, California

March 1960

Wholesale & Retail

Telephone VERNON 7-2179

An effort is made to maintain a stock of the 252 species of California shrubs and trees covered by this list. The limited stock of some of the species is sometimes exhausted. As propagating material is secured, other species are from time to time available. Inquiries may be made for desired species which do not appear on the list.

PRICE The retail price for gallon stock material is shown. Prices are f.o.b. Danville, California. Prices are subject to change without notice. Where large quantities are ordered we will quote special prices on request.

TERMS Cash with order except with customers having established charge accounts. No C.O.D. orders please.

SALES TAX Customers residing in California will please add 4% to cover sales tax.

PACKING On orders to go by freight or express please add 20% to cover cost of packing. Plants shipped by freight or express are forwarded at purchaser's expense and risk. Minimum order \$5.00.

GUARANTEE We guarantee all plants to be true to name and in good condition when shipped. We assume no liability greater than the purchase price and claims must be made within ten days after arrival. We make no warranty as to growth or behavior of the plants after delivery, as conditions are beyond our control.

The plants listed may be seen growing in our gardens and visitors are always welcome. The nursery is located on El Rio Road and may be reached by turning east off Highway 21 on El Portal Road, approximately 5 miles south of Walnut Creek, one mile north of Danville. Except for Saturday and Sunday an appointment is desirable. Closed Sundays June to October.

In preparing this list an attempt has been made to show the mature height and spread of shrubs and the mature height of trees. In the case of trees it should be understood the height is for adult specimens and that, except for some of the rapid growing species, these heights will be reached only after many years.

The Nursery specializes in the drought resistant shrubs and trees of California. With but a few exceptions the plants listed will require little or no summer water after they are established. During the first summer after planting some watering is desirable. The frequency of watering will depend on the time of planting, the location, type of soil and seasonal conditions. Where planting has been done during the fall or winter months a deep watering once a month

during the first summer will usually be sufficient. The first watering may be given during June.

Even though drought tolerant, many of the species will tolerate some water after they are established. Some will thrive under garden conditions. Species of *Fremontia*, and most species of *Arctostaphylos* and *Ceanothus*, not only require sharp drainage, but should be given little or no summer water after the first year. Coastal species of *Arctostaphylos* and *Ceanothus* seem to be more water tolerant than those which come from the dry interior. Where these are used in the hot, dry interior occasional summer watering may be desirable, especially where they are in full sun throughout the day.

It is highly important, in planting, that the root crown be placed at the natural contour. Where used on a level site, especially with *Fremontia*, *Ceanothus* and *Arctostaphylos*, it is an excellent idea to raise the contour a few inches. Stem rot is apt to occur where soil is allowed to build up around the stems. While some of the plants may tolerate fertilizers, the use of these is not recommended. It is believed that better plants are secured where they must send their roots far in search of nutrients. Cultural advice will, upon request, be given to the best of our experience.

For those who are unfamiliar with California Native Plants, the following references are cited:

An Illustrated Manual of California Shrubs by Howard E. McMinn.

Ceanothus by Maunsell Van Rensselaer & Howard E. McMinn.

This publication of the Santa Barbara Botanic Garden covers all the species of the genus, with their use in horticulture.

1.25	<i>Sphaeralcea ambigua</i>	Apricot Mallow	1-2	1-2
1.25	<i>Spiraea densiflora</i>	Mountain Spiraea	1-3	2-3
1.25	<i>Spiraea Douglasii</i>	Douglas Spiraea	2-4	2-4
1.00	<i>Stanleya pinnata</i>	Desert Plume	1½-3	1½-3
1.25	<i>Styrax californica</i>	Snowdrop Bush	4-8	4-6
1.50	<i>Torreya californica</i>	California Nutmeg Tree	15-70	
1.25	<i>Trichostema lanatum</i>	Wolly Blue Curls	3-5	4-6
1.25	<i>Trichostema Parishii</i>	Mountain Blue Curls	2-4	4-5
1.25	<i>Umbellularia californica</i>	California Bay	20-75	
1.25	<i>Vaccinium ovatum</i>	California Huckleberry	2-6	3-4

	<u>SCIENTIFIC NAME</u>	<u>COMMON NAME</u>	<u>HEIGHT</u>	<u>SPREAD</u>
1.00	Vancouveria parviflora	Small-flowered Vancouveria	$\frac{1}{2}$ -1	1-2
1.00	Verbena Gooddingii	Desert Verbena	1-1 $\frac{1}{2}$	2-3
1.00	Vitis californica	California Wild Grape	Vine	
1.50	Yucca brevifolia	Joshua Tree	16-30	
1.25	Yucca Whipplei	Our Lord's Candle		
1.25	Zauschneria californica	California Fuschia	$\frac{1}{2}$ -2	1 $\frac{1}{2}$ -2
1.25	Zauschneria cana	Gray Balsamea	$\frac{1}{2}$ -2	1-2
1.25	Zauschneria latifolia	Mountain Balsamea	$\frac{1}{2}$ -2 $\frac{1}{2}$	1 $\frac{1}{2}$ -2

From time to time we carry a few exotic plants which are desired by people who admire them in the gardens here. The following are available at the present time:

1.25	Arbutus unedo	Strawberry tree		
1.00	Cotoneaster microphylla var. cochleata			
.50¢	Cyclamen neapolitanum			
1.00	Eriobotrya deflexa	Bronze Loquat		
1.00	Gaultheria procumbens	Wintergreen		
1.00	Hunnemannia fumariaefolia	Mexican Tulip Poppy		
1.25	Juniperus Hornbrooki			
1.00	Osteomeles Schwerinae	Chinese Bone Berry		
1.00	Pyracantha	Weaver's Superba		
1.00	Rosmarinus officinalis prostratus	Creeping Rosemary
